

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director
Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

For a petition to be considered valid it must:

1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

30 Day Public Notice Report

Application # : FW-24922

Stream : Campbell Creek

Applicant : John E Zufall
Terri Westmoreland
313 East Collins
Columbia City, IN 46725-2715

Description : The applicant proposes to dig a 250' to 300' pond in the floodway. The pond will be excavated to a maximum depth of 10' with sideslopes of 5:1 and 4:1. The excavated material (approximately 300 cubic yards) will be used to elevate a proposed residential structure located landward of the floodway. A small portion of the fill appears to be located in the floodway. Details of the project are contained in information and plans received at the Division of Water on July 11, 2008 and August 4, 2008.

Location : Beginning approximately 1900' west of the State Road 26 and 680 West Road intersection and extending approximately 400' west and 500' north

Application # : FW-24924

Stream : Bald Knob Creek

Applicant : City of New Albany
Ronald Carroll
City-County Building, Room 316
New Albany, IN 47150

Description : Proposed installation of a new 2,600' long gravity sanitary sewer system will replace an existing gravity sanitary sewer system. The new sewer system will range from 12" to 15" PVC or Ductile Iron pipe. The sewer will run adjacent to and lie within the floodway of Bald Knob Creek primarily on the same alignment as the existing sanitary sewer. The sewer will cross the creek in two locations. Each crossing will be made nearly perpendicular to the stream. After installation of the new gravity sewer the site will be returned to its pre-construction state and original contours. Details of the project are contained in information and plans received at the Division of Water on July 14, 2008.

Application # : FW-24937

Stream : Sugar Creek

Applicant : Indiana American Water
David J. Elmer, PE
555 East County Line Road, Suite 201
Greenwood, IN 46143-1048

Description : A storm water outfall structure will be constructed along the west (right) bank of Sugar Creek to discharge supernatant from a water treatment facility located landward of the floodway. Two (2) 12" outfall pipes will be buried to a depth of 4' in the floodplain. The 2 pipes, each approximately 1000' long, will carry supernatant from the filter backwash lagoons to the creek. The pipe will terminate with a concrete end section that will conform to the bank slope. A flap gate will be placed at the end of each pipe to prevent backflow into the water treatment facility. An energy dissipater will be constructed at the base of the end section. The dissipater will consist of five (5) 8" by 16" by 8" concrete blocks. Also, riprap will be placed in a 12" thick by 12' wide by 45' long area between the concrete end section and the stream bank. No riprap will be placed below the ordinary high water mark. Details of the project are contained in information and plans received at the Division of Water on July 30, 2008.
